This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

UNIV. OF
CALIFORNIA

PUBLIC SERVICE LIBRARY

A Catalogue of the Books and Pamphlets in the Library prepared for the use of the Officials and Employes of the Company.

LIBRARY HOURS

Week days 8:30 A. M. to 5:30 P. M.
Saturdays 8:30 A. M. to 12:30 P. M.
Closed Sundays and Holidays.

RULES

The use of the Library is free to all employes who comply with the following rules:—

1. Books will be issued to any employe who signs a library application, approved by the head of his department. Books are sent free in Public Service mail-bags.

2. Circulating books may be retained for two weeks and may be renewed for the same period. Unbound periodicals (except the latest issue) may be kept from three to seven days, according to the demand of the magazine, and are not renewable.

3. BOOKS MUST BE RETURNED PROMPTLY OR RENEWED.

4. Books can be renewed by mail or telephone, without returning them to the Library. An application for renewal must give author and title of the book, with the date it was issued. The renewal will date from the time the application is received at the Library.

5. Books are considered in good condition unless otherwise noted on the title page. If lost, or damaged in any way, they must be paid for by the borrower.

6. The Librarian should be immediately notified of change of business address.

This catalogue will be supplemented by the issuance of yearly lists of books and pamphlets.

4C20 1

This catalogue has not attempted to include under its numerous subject headings the reports or papers read before the National Associations, nor has it included the Government, State or Municipal publications, that are received at the Library from time to time. These, together with the books and pamphlets listed herein, are reviewed and indexed by author and subjects, upon their receipt by the Librarian, on catalogue cards. A similar index is also kept of all important articles appearing in periodicals. Both of these indexes are accessible to all Company employes.

For those who cannot conveniently come to the Library, the Librarian will be pleased to answer telephone inquiries and to look up information upon almost any subject. In inquiring for information, whether by telephone or by written request, the more specific the request is made as to whether everything on the subject is desired or only the best elementary or advanced works, the better able the Librarian is of being of assistance.

The Library and the services of the Librarian and her assistants are at the disposal of all Company employes and an invitation is extended to all to make use of the facilities provided.

ALMA C. MITCHILL,
Librarian.

Haskell, A. C. ..... How to make and use graphic charts. 1919

Hawkes, H. E., Luby, W. A. and Touton, F. C. ..... First course in algebra. 1910.

Hering, C. ..... Ready reference tables. 1904. 1914

Howe, G. ..... Mathematics for the practical man. 1911

Hudson, R. G. ..... Engineers' manual. 1917

International correspondence schools ..... Instruction paper in arithmetic. 1900.

Karapetoff, V. ..... Engineering applications of higher mathematics. 1912.

Koch, E. H. ..... Mathematics of applied electricity. 1912

Moseley, A. W. ..... Practical mathematics. 1917. pamp.

Murray, D. A. ..... Plane and spherical trigonometry.. 1902

Palmer, C. I. ..... Practical mathematics—the essentials of arithmetic, geometry, algebra and trigonoemtry. 4v. 1912

Peddle, J. S. ..... Construction of graphical charts. 1919

Pierce, C. A. and Carver, W. B. ..... Handbook of formulas and tables for engineers. 1916.

Runge, C. ..... Graphical methods. 1912

Sloane, T. O. ..... Elementary electrical calculations. 1909

Smithsonian Institutions ..... Smithsonian mathematical tables Hyperbolic functions. 1909.

Smoley, C. K. ..... Parellel tables of slopes and rises. 1917

Society for the promotion of engineering education ..... Syllabus of mathematics. 1912.

Sprague, C. E. ..... Logarithms to 12 places and their use in interest calculations. 1911.

Steinmetz, C. P. ..... Engineering mathematics. 1911

Van Tuyl, G. H. ..... Complete business arithmetic. 1911

Vega, G. ..... Logarithmic tables of numbers and trigonometrical functions. 1911.

Wells, W. ..... University algebra. 1880

Wentworth, G. A. ..... Elements of algebra. 1881

Wentworth, G. A. ..... High school arithmetic. 1881

Wentworth, G. A. ..... Plane and solid geometry. 1899

Wentworth, G. A. ..... Plane and spherical trigonometry. 1903

Wynne, W. E. and Sparagon, B. E. ..... Handbook of engineering mathematics. 1916.

PHYSICS.

Barker, G. F. ..... Physics; advanced course. 1892
Clark, W. ..... (A) Century of light. 1917
Comstock, D. F. and Troland, L. T. ..... Nature and matter of electricity. 1917.
Duff, A. W. ..... Text-book of physics. 1910
Duncan, R. K. ..... (The) New knowledge; a popular account of the new physics and the new chemistry. 1912.
Ganot, A. ..... Elementary treatise on physics. 1910
Halliday, H. M. ..... Essay on the common origin of light, heat and electricity. 1897. pamp.
Hoadley, G. A. ..... Elements of physics. 1908
Mac Laurin, R. C. ..... Light. 1909
Nichols, E. L. ..... Elements of physics. 3 vol. 1908-1909
Nichols, E. L. ..... Laboratory manual of physics and applied electricity. 1912.
Nichols, E. L. ..... Outlines of physics. 1904
Northrup, E. F. ..... Laws of physical science. 1917
Randall, J. A. ..... Heat. 1914
Schlick, M. ..... Space and time in contemporary physics. 1920
Smithsonian Institution ..... Smithsonian physical tables. 1910
Watson, W. ..... Text-book of physics. 1907
